SPELLJAMMER: ADVENTURES IN SPACE

This document corrects and clarifies some text in *Spelljammer: Adventures in Space*. The changes appear in recent printings of the product.

ASTRAL ADVENTURER'S GUIDE

Astral Elf (pg. 10). The following sentence has been appended to the "Creature Type" subsection: "You are also considered an elf for any prerequisite or effect that requires you to be an elf."

Hadozee Story Text (pg. 13). The story text for the hadozee has been updated as follows:

Hadozees' progenitors were mammals no bigger than housecats. Hunted by larger natural predators, they took to the trees and evolved wing-like flaps that enabled them to glide from branch to branch.

Today, hadozees are sapient, bipedal beings eager to leave behind the fearsome predators of their homeworld and explore other worlds.

In addition to being natural climbers, hadozees have feet that are as dexterous as their hands, even to the extent of having opposable thumbs. Membranes of skin hang loosely from their arms and legs. When stretched taut, these membranes enable hadozees to glide. Hadozees wrap these wings around themselves to keep warm.

Glide (pg. 13). The Glide trait's text has been updated as follows:

Glide. When you fall at least 10 feet above the ground, you can use your reaction to extend your skin membranes to glide horizontally a number of feet equal to your walking speed, and you take 0 damage from the fall. You determine the direction of the glide.
